THE STONES MARKING IT LOOKED UP BY THE COUNTY COMMISSIONERS.

In pursuance of an Act of the last Legislature, relating to the location of the county boundaries in this line to be laid up and report the location of the stone marking the dividing line between this county and Maryland, on Monday County Commissioners A. S. Sherry, L. D. Keller and J. T. Hart, started at the line of this and York counties to comply with the requirement. Adams county borders on Maryland a distance of twenty-five miles, and yet in their search, on foot, the gentlemen are confident they made considerably more than twice that distance, the whole number of markers, twenty-five, having been found. All are one foot square, and when in proper position stand three feet out of the ground. The stone stones, which every fifth mile, have the Penn. family crest on one side and that of Lord Baltimore on the other, the last being P on the northern face and M on the southern. From Commissioner Sherry's notes we learn the following:
Starting at the point where the York and Adams county lines join the Maryland line, the first stone was found in an open field on the farm of John A. Brumaght, in Union township, in good condition, with P on one side and M on the other.
2d, a Crown Stone, on land of Philip Lums, in same township, in good condition, from Hanover and Westminster road to Littlestown. The stone had been broken off near the ground and put in again on a new original position; carving found very distinct.
3d, on land of Jacob and David Kump, in same township, in good condition, on land of D. Matthews, same township, in good condition, from Hanover and Westminster road to Baltimore turnpike; badly mutilated, but when or by whom could not be ascertained.
5th, on line of lands of Jacob Decker and Nath. Brown, Germany township; broken off, the upper portion lying in field of the first named.
6th, on line of lands of Jacob Staley, same township, and Jacob Hildebrand, Carroll county, in good order.
7th, a Crown Stone, on land of A. M. Michel, near Kilmaster's mill, near Kingsdale; in good order but out of its proper place.
8th, on land of Uriah Willard, Germany township; lying in open field, about one-half of lower side gone, the top all right.
9th, on land of Augustus Smith, same township, in open field, in good condition.
10th, on land of John H. Kump, same township, near Attorney's office, in good condition.
11th, on land of Mr. Williams, Mountjoy township, in open field, in good condition.
12th, on land of Abraham Hesson, same township, 1 mile north of Hanover. This stone should be a Crown Stone but it was found so badly mutilated that the marks of the hammer could not be distinguished.
13th, on land of Jacob Whitaker, Cumberland county, near junction of York and Adams roads, in open field, in good order.
14th, on land of same, in same township, on bank of Marsh creek, in good order.
15th, on land of Jacob Wright, Freedom township, and in current position, standing along a fence, but in good condition.
16th, on land of Mr. Gilliland, same township, along a fence, badly mutilated, but seems to be in original position.
17th, a Crown Stone, on land of John Weigand, same township, in open field, stone lying down, but in good state of preservation.
18th, on land of George Hawn, Liberty township; broken in two pieces.
19th, on land of Jacob J. Cooper, same township; out of ground and on a rock in the field, according to reports of neighbors about fifty years ago, on the Maryland side. It is also related that the stone that some years ago a previous owner of the farm took the stone home, intending to use it in building a lake, and that his neighbors advising him that trouble might come out of it, he returned the stone to the field where it now lies.
20th, on land of Mr. Dombine, Freedom township; out of ground but in good condition.
21st, on land of Mr. Ryan, Liberty township; somewhat defaced on Pennsylvania side.
22d, a Crown Stone, in garden of Adam Treaster, same township; one of the best preserved and most distinct along the entire line.
23d, on land of C. B. Martin, same township, in good condition.
24th, on land of Jacob Miller, same township; broken in two pieces and somewhat defaced.
25th, on land of Uriah Harkness, same township; defaced, the broken top showing the P, but so badly injured on the Maryland side that the M is not visible.
From this line is about 1 1/2 miles to the Maryland county line, on land of James McDevine, Liberty township.
This is the County's new error, one of the finest, costing \$438, was set in place between the centre of Adams at the north end of the county house, parlor on Saturday, morning, and on the Maryland side, the gift of the Adams County Fire Insurance Company, adds another adornment, it and the mirror reflecting the furnishing of the parlor, of which not only our fire department but citizens generally may be justly proud. We doubt if any fire company, even in the cities, can show their friends a room so richly and so judiciously furnished. The numbers take pride in the new decorations through the convenient and pleasant home of the company. Nothing is to be placed on the stairs and new wallpaper done.
PROPERTY SALES.—Simon J. Cardon on Thursday purchased the farm of Wm. T. Rogers, Adams township, 217 acres, for \$5,000 cash.
Mrs. C. W. Duncanson sold to Mr. A. D. Boller her half interest in the farm in Freedom township, on which Mr. Isaac Welker has long been the tenant.
Berkeley Bollerham has sold his farm in Mr. D. Brown, of Cuthbert, for \$4,000. Mr. B. has purchased of Miss L. Bessing, a property in Daniel Pipe Creek, says the Courier.
A MEMBER of the supposed case on Mr. Henry Hoover's farm, near New Chester, has been at this office. A similar piece was taken by Prof. E. S. Heidenhain, near an excavation, a witness, he is sorry to say, without any commercial value.
At its last meeting the Town Council directed Street Commissioner Hanley to prepare a card for the collection and removal of ashes placed by property holders in front of their premises.
We are officially informed that the object of the engineering engineers in the South is to build a line from Baltimore to New York for the purpose of completing a new line. The whole thing may be dropped upon the completion of the preliminary survey.
Two men who had been selling cloth in Harrisburg, recently, skipped from being sent to jail or home late. They went to York county, Pa. Look out for them.—Advocate.

He studied theology in Gettysburg Seminary, was licensed in 1850, and his first pastoral charge was at Hanover, where he remained until 1857.
